A WORD FROM THE PRESIDENT

The first ATypI conference in Prague took place in 1969, when I was 16 years old. Prague back then was a very different city to the one that we shall experience during our conference in 2004: The Nazis had left and the Communists had arrived just a little more than two decades before. Communism would be in place for another twenty years. In fact “Prague Spring” took place in 1968 when attempts were made to create “socialism with a human face,” culminating in a failure that caused five Warsaw Pact member countries to invade during August of 1968. But I am happy to report that the ATypI conference still took place in 1969. Moving on twenty years, at the end of 1989 Prague became part of a democratic country, and the Communists were gone.

This conference should be interesting: ATypI is once more at a crossroads, now emerging from two years of difficult legal and financial management projects; and the Association has been poised and is ready for further evolution. For example, this conference will see significant changes in the line-up of Board members, and a new President after 9 years. So far, ATypI has remained stalwart, reliable and independent. We have a stable environment promoting learning and development, in which continuity and consistency have been maintained in the face of continual and dramatic change. I am very proud, in my role of President, to have had a hand in this successful process over nearly a decade.

And so ATypI is at the crossroads, as is the city Prague. What better title for our conference than Crossroads of Civilizations. A special interest for me this year is the important focus on the considerable creative contribution of the Central and Eastern European design world and its relation to international design.

We have particular thanks to give to some very important sponsors. The partnership with VŠUP is very important to ATypI, as we continue to forge relationships with design schools the world over. Our Platinum sponsor Agfa Monotype is a long-time and special sponsor who has remained a constant friend to our Association. And in particular this year, Typo Magazine of Prague has made a major contribution in printing our program and other materials, and making a video of the proceedings of the conference which will be available afterwards. Thanks to all our sponsors, who you will find listed in this program; they have once again been a critical part of the life-blood of ATypI.

I know I am going to enjoy this conference; it is my sincere hope that you do too!

Mark Batty, President, ATypI

[BF] The Business of Selling Fonts
In the recent months, typographic Internet lists were filled with discussions on the subjects of font licensing, digital rights management and personalized fonts. This topic was spoken of already in the past years, but it is only this year that several initiatives have emerged that actually may lead to practical solutions. The ATypI Prague conference addresses the Business of Selling Fonts in two sessions.
EULAS & FONT PERSONALIZATION T. Harrison, L. Penney | Sat 08:45, Archa Room 3
VALUE OF A FONT Carima El-Behairy | Sat 12:00, Archa Room 3

[CC] Crossroads of Civilizations
Crossroads of Civilizations is the main theme of the ATypI Prague 2004 conference. The speakers in this track will talk about cultural exchange, emigrés, national and regional identity, and about living and working in multicultural fields.
CROSSROADS OF CIVILIZATIONS  Rick Poynor | Thu 20:20, Archa Hall 1
BUNDESSCHRIFT  Gerard Unger | Fri 09:30, Archa Hall 1
THE EMIGRÉS AND MODERNITY  Paul Stiff | Sat 08:45, Archa Hall 1
ALL THAT IS SOLID MELTS INTO ARIAL…  Steve Rigley | Sat 10:30, Archa Hall 1
A DUTCHMAN IN POLAND  Martin Majoor | Sun 08:45, Archa Hall 1

[CE] Central and Eastern European Traces
People originating from countries of Central and Eastern Europe have influenced the typography and graphic design of the 20th and 21st century. Some of them emigrated and worked, or still work in Western Europe or the USA, while others remained active in their native countries. This track will analyze the traces left by Czech, Slovak, Russian, Hungarian and Polish typographers and designers — in the past and today.
LIFE AND WORK OF JOSEF TÝFA  F. Štorm, P. Zelenka, J. Týfa | Fri 11:15, Archa Hall 1
WOOD ENGRAVING AND LETTERING IN THE OEUVRE OF VLADIMIR FAVORSKY
Yuri Gherchuk | Sat 08:45, Archa Hall 2

IMRE REINER: THE ALPHABET AS ART  Ken Barber | Sat 09:30, Archa Hall 1

e-a-t (EXPERIMENT AND TYPOGRAPHY)  J. Balusikova, A. Záruba | Sat 09:30, Archa Hall 2

ON VOJTĚCH PREISSIG  Richard Kegler | Sat 10:30, Archa Hall 2

ON OLDŘICH MENHART  Veronika Burian | Sat 11:15, Archa Hall 2

CZECH TYPE LIBRARY  F. Štorm, M. Pistora, O. Karlas | Sat 13:30, Archa Hall 2

ON LADISLAV SUTNAR  Iva Knobloch | Sat 14:15, Archa Hall 2

FREEDOM ON THE FENCE  Andrea Marks | Sat 15:30, Archa Hall 1

CYRILLIC LETTERS: THEIR ORIGIN, HISTORY AND EVOLUTION  Vladimir Yefimov | Sat 16:15, Archa Hall 1

IDENTITY OF TYPOGRAPHERS IN HUNGARY  Krisztina Somogyi | Sun 10:30, Archa Hall 2

[EP] Essence and Practice
This track analyzes various essential and practical questions of type design and typography, such as type classification, the impact of whitespace, legibility and signage, small type, animated type, and multiple media.

THE HITCHHIKER’S GUIDE TO TYPOGRAPHY  Cyrus Highsmith | Fri 08:45, Archa Hall 1

ABOUT NOTHING, MAINLY  Peter Biľak | Fri 13:30, Archa Hall 1

PARISINE AND LEGIBILITY  Jean François Porchez | Fri 13:30, Archa Hall 2

THE KEYBOARD IS A TOOLKIT  Max Kisman | Fri 14:15, Archa Hall 1

SILK PURSE AND SOW’S EAR  Mark Barratt | Fri 15:30, Archa Hall 2

BRITISH TRAFFIC SIGNS  Ole Lund | Fri 16:15, Archa Hall 1

COMPOSITION OF INNER SPACE  Eric Menninga | Sat 15:30, Archa Room 3

MICROTYPOGRAPHY  Mark Thomson | Sat 16:15, Archa Hall 2

HELVETICA IN MOTION  Jakob Trollbäck | Sun 11:15, Archa Hall 1

[FT] Fonts and Tools
This practical-oriented track focuses on software tools used in typeface design and font production, on font formats and other technical issues. Several new software products will be announced.
[MN] Making the Newspaper
Newspaper typography is one of the most demanding fields of typographic activity — the daily newspapers do not change their design very frequently, so once developed, a typographic systems remains exposed for years to millions of users. Two panel discussions and two presentations will concentrate on typefaces used in newspaper design as well as on the general questions of newspaper typography.

THE ACCIDENTAL TEXT FACE Christian Schwartz | Fri 10:30, Archa Hall 1
TYPOGRAPHY IN SPANISH DAILY NEWSPAPERS Angel J Castaños Martínez | Sat 11:15, Archa Hall 1
MULTIPLE POINTS OF ENTRY S. Esterson, R. F. Rehe, J. D. Berry | Sat 13:30, Archa Hall 1
DAILY TYPES D. Berlow, G. Unger, J. F. Porchez, J. D. Berry | Sat 14:15, Archa Hall 1

[SD] For Something Completely Different
This track’s aim is to prove that typography doesn’t need to be all-serious.

THE WORLD’S EVEN BIGGER HAMBURGEFONTS Timothy Donaldson | Fri 12:00, Archa

[ST] Between Student and Teacher
One of the topics frequently discussed among typographers and type designers is education. This track includes a panel discussion detailing different approaches to teaching typeface design.

EDUCATION IN TYPE DESIGN E. van Blokland, B. Jacobs, J. F. Porchez, G. Leonidas | Sat 15:30, Archa Hall 2
[TB] Typographic Babylon
Multilingual typography and typeface design is the focus of the Typographic Babylon track. A panel discussion about typeface design for multiple writing systems and several presentations about Central European diacritics will be complemented by talks about Unicode, mathematical characters and Japanese typography.

DECODE UNICODE! Johannes Bergerhausen | Fri 14:15, Archa Hall 2
THE DEVELOPMENT OF DIACRITICAL MARKS Petra Černe Oven | Fri 15:30, Archa Hall 1
JAPANESE USING INDESIGN AND OPENTYPE Taro Yamamoto | Fri 15:30, Archa Room 3
THE TENDERNESS OF PRINCES BEING LATE V. Gaultney, A. Twardoch |
   Fri 16:15, Archa Hall 2 and Sat 10:30, Archa Room 3
FONTS FOR MATHEMATICS Johannes Küster | Sat 13:30, Archa Room 3
CROSSROADS OF SCRIPTS Jovica Veljović | Sun 09:30, Archa Hall 1
WORLD TYPES V. Gaultney, J. Hudson, G. Leonidas, G. Wade, V. Yefimov, M. Zhukov |
   Sun 10:30, Archa Hall 1
THEME

CROSSROADS OF CIVILIZATIONS

The ATypI Prague Conference theme for 2004 is “Crossroads of Civilizations“ – which recognizes the unique and strategic place that Prague occupies in the heart of Europe, and refers to the unique place that Prague has in the world of both graphic design and ideas.

After 35 years, ATypI is returning to Prague, Czech Republic, for its 48th annual conference. The conference, co-produced by Vysoká škola uměleckoprůmyslová (VŠUP), the Academy of Arts, Architecture and Design in Prague, will be conducted in the famous Archa Theatre, an avant-garde underground theater complex in the middle of Prague.

The conference program focuses on the special creative contribution of Central and Eastern European design world and its relation to international typographic developments, gathered under the themes Central and Eastern European Traces and Crossroads of Civilizations. There will also be presentations covering many additional international typographic and design subjects.

Rick Poynor will be the Keynote speaker for the 2004 Conference. Poynor is the founding editor of Eye Magazine in London in 1990, and now writes a column for Eye and its website. Poynor will speak about the new spirit in the design and typography field which is coming from the countries of Central and Eastern Europe and influencing the West, and the designer’s responsibility for the visual environment. In addition, there will be papers covering many aspects of the creative work of typographic designers worldwide.

A major conference sub-theme, Making the Newspaper, focuses on newspaper design and typography, with a number of presentations and panel discussions on international newspaper design subjects. There will in addition be papers covering many additional international typographic and design subjects. These themes include: The Business of Selling Fonts, Essence and Practice, Fonts and Tools, Making the Newspaper, Between Student and Teacher, Typographic Babylon. The theme For Something Completely Different is expected to deliver additional amusement.
THE PRAGUE SPONSORS

These are the institutions and companies who have sponsored the ATypI Prague 2004 conference, and made this event possible. The ATypI Board of Directors thanks each of our Sponsors for their support.

VŠUP (VYSOKÁ ŠKOLA UMĚLECKOPRŮMYSLOVÁ) – Education Partner
Education Partner with ATypI for the Prague conference
www.vsуп.cz
The Academy of Arts, Architecture and Design in Prague (Vysoká škola uměleckoprůmyslová, AAAD/VŠUP) was founded in 1885 as the first and only state school of art in Czech lands. Built in neo-renaissance style, it is located in the very heart of the Old Town, surrounded by remarkable historical monuments. During the time of its existence, AAAD has gradually built complex educational structure that comprises of both studio classes and classes of art history and theory. Talent, practical skills but also the will to understand artistic creativity on the background of diverse historical and cultural issues are the most important criteria for selecting the students from many candidates that annually apply to study at our school.
Agfa Monotype was formed in 2000, when the Typographic Systems Division of Agfa merged with Monotype Typography and became a wholly owned subsidiary of Agfa Corp., one of the world’s largest imaging companies which is part of the Agfa-Gevaert Group. Today, Agfa Monotype has more than 150 employees in offices in Boston, Chicago, Boise, Seattle, Redwood City, Calif., London, Hong Kong, Beijing and Tokyo.

Our customers include professional graphic designers and consumers requiring high-quality fonts, printer manufacturers and developers, and manufacturers and developers of consumer electronics devices requiring fonts.

Our mission is to be the leading international supplier of fonts and font technologies, including support for worldwide languages, print drivers, color capabilities and technologies that enhance communication globally.

Agfa Monotype’s company culture is formed by an international blend of employee backgrounds. Our professional framework is based on dedicated customer partnerships, intellectual challenge, teamwork and our will and ability to succeed.
ADOBE SYSTEMS – Gold Sponsor
www.adobe.com
Adobe helps people and businesses communicate better through its world-leading digital imaging, design, and document technology platforms for consumers, creative professionals, and enterprises. Adobe’s platform-driven approach is focused on providing more complete and innovative solutions for each of its customer segments than ever before. With its digital imaging and digital video software products, including gold-standard Photoshop software and a comprehensive professional digital video platform, Adobe is helping customers edit, manage and share digital images and video with the highest quality results. And the Adobe Intelligent Document Platform enables organizations to connect employees, customers, and partners with information through the use of Adobe’s PDF file format—the de facto standard for secure electronic document exchange.

Founded in 1982, Adobe today is one of the world’s largest software companies, generating annual revenues exceeding US $1.2 billion. More than 3,700 employees across the world share Adobe’s commitment to helping people communicate better. Headquartered in San Jose, California, Adobe is traded on the Nasdaq National Market under the symbol ADBE.

TYPO MAGAZINE – Gold Sponsor and Main Media Partner
www.magtypo.cz/english.html
The innovative bi-monthly magazine on typography, graphic design and visual communication. Target areas are Central and Eastern Europe and broader audiences worldwide. TYPO’s readers are mostly graphics professionals and operators, designers, typography specialists and also representatives of supplier companies and employees within marketing departments. TYPO magazine focuses on typography, graphic design and visual communication. It aims to be neither too technical nor too elitist, but rather critically informative. The core content consists of articles appearing in regular sections, with smaller reviews and glossies added. The basic goal is to discuss typography from various viewpoints, as we consider this important field to be a part of our culture.
**FONTLAB Ltd. – Gold Sponsor**

**www.fontlab.com**

Fontlab Ltd. is an international software vendor that has stayed at the forefront of digital font management by remaining devoted to developing font editors and typography products. Their full line of products is dedicated to solving the most complex typography issues. These products include outline and bitmap font editors, font format converters, and special-purpose font utilities: FontLab, AsiaFont Studio, TypeTool, TransType, BitFonter, ScanFont, SigMaker, CompoCompiler, FontFlasher, and FONmaker. In 2004, Fontlab Ltd. plans to release long-anticipated major new versions of their flagship products: FontLab Studio 5, BitFonter 2 and TransType 3.0. The Fontlab Ltd. team works in offices in Canada, Germany, Panama, Russia and USA.

**MICROSOFT – Silver Sponsor**

**www.microsoft.com/typography**

Microsoft’s typography group researches and develops fonts and font technologies. Recently completed font projects include the TDC award winning Nyala and Microsoft Uighur fonts and the family of handwriting fonts Segoe Script. The group is currently busy updating and revising over 170 fonts to be included in the next version of Microsoft Windows as well as fonts for Microsoft Office, MSNTV, Windows CE, Xbox and other Microsoft products. Microsoft typography also supports and promotes the development of TrueType and OpenType fonts by independent type vendors, providing development, test and proofing tools, specifications and recommendations.

**FONT BUREAU – Silver Sponsor**

**www.fontbureau.com**

Font Bureau was founded in 1989 by noted publications designer and consultant Roger Black and type designer David Berlow to serve the emerging needs of microcomputer-based magazine and newspaper publishers seeking unique typographic identities. The New York Times, Newsweek and Smart were among the first clients to commission type designs. During the past fifteen years, Font Bureau has designed over 1000 fonts for over 300 publications. A few of these designs remain the exclusive property of the publications but most have become part of Font Bureau’s Retail Library.
**STUDIO MARVIL** – Silver Sponsor

www.marvil.cz

Studio Marvil is a graphic design studio and the only one Adobe Authorised Service Provider in the Czech Republic. The books designed by Marvil are regularly awarded at “The Most Beautiful Czech Books Contest”. Marvil’s corporate client list includes Volkswagen, Seat, GE Capital, ČSOB Bank, ČEZ or Škoda Praha.

**PARATYPE** – Bronze Sponsor

www.paratype.com

Multilingual font library ParaType offers you the best typeface support with Latin, Cyrillic, Arabic, Greek, Georgian and Hebrew fonts for Macintosh and Windows platforms. ParaType Library is well-balanced with wide variety of Latin and non-Latin fonts and also contains world largest Cyrillic font collection in PostScript and TrueType formats. Besides this, there is the largest collection of digital multilingual typefaces developed by the best Russian type designers within last 50 years. The ParaType Library includes brilliant classic and brand-new typefaces and proved to be useful in making good typography in hundreds of languages.

**CREATIVEPRO / INDESIGN MAGAZINE** – Bronze Sponsor

www.creativepro.com

Creativepro.com is the complete online resource for Creative Professionals. Creativepro.com delivers news, reviews, features, and how-to’s about the products and services that Creative Professionals use everyday. New from creativepro.com and David Blatner: InDesign Magazine, The Complete Resource for InDesign Professionals. FREE Trial Issue! http://www.indesignmag.com

**TIRO TYPEWORKS** – Bronze Sponsor

www.tiro.com

Tiro Typeworks was founded in 1994 by John Hudson and Ross Mills, and specializes in custom font solutions for multilingual communication. Tiro Typeworks remains a small company, but with big clients, including Microsoft Corp., Adobe Systems, and Apple Computer, as well as numerous smaller software companies, academic organizations, publishers and government agencies. Among their typefaces for the Cherokee, Cyrillic, Greek, Ethiopic, Hebrew, Inuktitut, Latin and other scripts are several international award winners.
DESIGNIQ – Bronze Sponsor

www.designiq.cz

Graphic design studio Designiq was established in 1997 by Filip Blazek, since 2003 it is active under the name Designiq. It is specialized in two main creative scopes – logotype and corporate identity and design services for non-government and cultural organizations. Designiq also provides services for type designers (support and consultancy for Central European characters).

ALBA DESIGN PRESS – Bronze Sponsor

www.albadesign.com

Alba Design Press is a Czech design studio and a publishing house specializing in the field of photography, graphic design, typography and visual communication. The studio has been involved in organizing exhibition projects about Otto Neurath and Isotype, Czech and Slovak typography (www.e-a-t.org) and design activities such as Deleatur, Bienale Brno, Alba Photo series and etc. The driving force of the company is a Czech graphic designer and publisher Alan Záruba.

QUARK – Bronze Sponsor

www.quark.com

Quark has been developing superlative software since its flagship product, QuarkXPress™ software, changed the course of traditional publishing.

Today, Quark is developing the next generation of tools to create and manage content for cost-effective delivery to multiple media. QuarkXPress sparked a revolution in desktop publishing. Quark Publishing System™, Quark™ Content Manager, and Quark™ Dynamic Document Server bring organization and efficiency to content management and publishing in the Internet age.

From its headquarters in the United States, Switzerland, and India, Quark reaches around the world to provide superior software and enterprise solutions to more than four million users in 18 languages. www.quark.com
Our thanks to the program committee who have put together our program for this year.

**PETER BIĽAK** was born in Czechoslovakia and now works in The Netherlands, in the field of graphic and type design. In 1999 he started his type foundry Typotheque. In 2000, together with Stuart Bailey, he co-founded DOT DOT DOT magazine. He teaches typography part-time at the postgraduate course Type & Media at the Royal Academy of Arts in The Hague.

**FILIP BLAŽEK** (born 1974) studied private high school of art in Prague (graphic design; 1991–1995) and took a master’s degree in cultural anthropology at Charles University, Prague (1995–2001; dissertation on “Typography and Czech Society in 20th Century”). He has worked as a graphic designer since 1993; since 1997 as a freelancer; since 2003 in his own studio Designiq. He is a co-author of a book Practical Typography (together with Pavel Kocička; ComputerPress 2000). He contributes regularly to the professional periodicals Deleatur, Umeni & Remesla, Typografia, and Grafika.cz. More recently he is a regular contributor to TYPO magazine, focused on typography and design, which he established in 2003 with a group of young typographers. He also manages the website Typo.cz for Czech graphic designers. (www.designiq.cz, www.typo.cz)

**THOMAS PHINNEY** (TypeTech Forum) is involved in the design, technical, historical and business aspects of type. His new typeface, with the working name of “Geode,” is an upcoming Adobe Original release. Thomas has worked with Adobe’s type group for seven years, currently as program manager for fonts and core technologies, and has recently relocated to Adobe’s Seattle offices. He has a Master’s degree in typography and design from RIT, and an MBA from UC Berkeley.

**ERIK SPIEKERMANN** is information architect, type designer (FF Meta, ITC Officina, FF Info, FF Unit, LoType, Berliner Grotesk et al) and author. He was founder in 1979 of MetaDesign, Germany’s largest design firm with offices in Berlin, London and San Francisco. In 1988 he started FontShop. He holds an honorary professorship at the Academy of Arts in Bremen, is board member of ATypI and the German Design Council, and president of the ISTD, International Society of Typographic Designers. In July 2000, Erik left MetaDesign
Berlin. He now lives and works in Berlin, London and San Francisco, designing publications, complex design systems and more typefaces.

**FRANTIŠEK ŠTORM** was born in 1966 in Prague, Czech Republic. He graduated in 1991 from the Academy of Applied Arts in Prague where he studied book and type design under Professor Jan Solpera, and was an assistant at the same studio between 1991 and 1995. In 1993 founded the Storm Type Foundry in Prague in 1993 with the aim of restoring the values of classical typography for the benefit of digital technologies. Today he is a freelance type-designer, photographer, xylographer and howling computer programmer, as well as the Frantisek is head of the Typography & Type department at Vysoká škola uměleckoprůmyslová, the Academy of Arts, Architecture and Design.

**ADAM TWARDOCH** born 1975 in Poland, Adam Twardoch now lives in Frankfurt (Oder), at the German-Polish border. Adam specializes in font tool development, font technology and multilingual typography, with special focus on Central European issues and OpenType. Since January 2004, he is scripting products and marketing manager at Fontlab Ltd. In addition, he serves as typographic consultant to MyFonts.com and provides consulting services to clients such as Linotype Library and Tiro Typeworks. He regularly writes and lectures about fonts and typography. He is member of the ATypI Board and ATypI country delegate for Poland. And he helps type designers to get their ogoneks right.

**EMIL YAKUPOV** was born and lives in Russia. His interests and activities of the last 15 years belong to digital typography and computer fonts. Since early 1990s he has worked for ParaType (then ParaGraph) as a product manager and later as a director. ParaType is a multilingual type foundry, the biggest and renowned supplier of Cyrillic fonts. Accepting Russian and Soviet type heritage, ParaType not only converted and redesigned the library to digital format, but notably expanded type collection with new original fonts and Cyrillic adaptations of the best Latin types. ParaType applies multilingual approach to font developments – standard character set of ParaType fonts covers main European languages including newcomers in EC.
ALAN ZÁRUBA (born 1964) holds an MA in Typo/graphic studies from London School of Printing. He founded Alba studio Ltd. in 1996, and later Studio Alazar in The Hague. In 1997 he started a collaboration with Prof. Zdenek Ziegler, one of the most influential figure of the modern Czechoslovak graphic design scene. With his colleagues and design historian Dr. Iva Janakova he co-founded the design magazine Deleatur and served as editor. Since 1998 he participates regularly in national design events, and has received many awards for design and typography. At present he is active in design work in Prague and the Hague; in writing about design issues for Czech, Slovak and Italian magazines; guest teaching at the Academy of Applied Arts and Architecture in Prague (where he is a current PhD. candidate) and the Merz Academy in Stuttgart; working on an organization committee of the International Graphic Design Biennale in Brno 2004 and the ATypI Congress 2004 in Prague, among other events.

PAVEL ZELENKA was born in 1970 in the Czech Republic. He is a self-taught graphic designer. After five years of medical studies he left university to become graphic designer. In 1995 he co-founded two-person DTP business called Marvil, which within a few years became a full service graphic and pre-press company employing 10 people. His work has been awarded in annual exhibition “The most beautiful books” in Prague. He is an OpenType and Unicode enthusiast and his company, Studio Marvil, has converted more than 3000 fonts to OpenType format for URW++. In 2003, together with his friends he began to publish Typo magazine, a Czech/English bi-monthly concerning typography, visual communication and graphic design.

MAXIM ZHUKOV – his main occupation is multilingual typography. For many years he served as a typographic coordinator to the United Nations. Zhukov is involved in typeface design, consulting for many individual designers and type foundries. He taught typographic design at his alma mater, Moscow Printing Institute, and now teaches at Parsons School of Design and Cooper Union in New York. Maxim Zhukov writes on typography and type design. He is a member of a number of Russian and American professional societies and associations. He is a member of the Board of ATypI, and the country delegate for Russia.

Keynote speaker Rick Poynor speaks about the new spirit in the design and typography field which is coming from the countries of Central and Eastern Europe and influencing the West, and the designer’s responsibility for the visual environment. Crossroads of Civilizations | 55 minutes

Thu 30 Sept 20:00
A few years ago my Demos and Praxis were chosen to be the typefaces for the corporate identity of the German government. These types are my first digital type designs; they were designed in 1974–76. At that time circumstances for type design were radically different from what they are nowadays. Those were horrifying and amusing days for anyone in the graphic industry. What makes Demos and Praxis suited to representing the Bundesregierung in 2004? In some ways these are the most experimental faces I have made. Fifty years of typographic history and a detailed analysis of my type designs.

**BUNDESSCHRIFT** A typeface for the German government

**LIFE AND WORK OF JOSEF TÝFA**

Josef Týfa is a living legend of Czech typography, born in 1913. His major contribution for the development of advertising and book design begins in 1950s and continues virtually up to the present times. He is an author of numerous original typefaces: ITC Tyfa, Academia, Juvenis, Amos, etc. and being 90 years old, still prepares new sketches for digital re-storing of his older designs. František Štorm and Pavel Zelenka will review Týfa’s inspiration sources, progression and influences on today’s generation of graphic designers.

Peter Biľak

ABOUT NOTHING, MAINLY

How to make nothing is the hardest thing for a designer. Meanings of negative space, gaps, word separators, white, silence or zeros will be discussed, presenting visual material from different disciplines to make a point that withdrawing attention from the objects and becoming aware of the “nothing” liberates us to focus on the essence rather than forms.

Essence and Practice | 45 minutes
Jean François Porchez

PARISINE AND LEGIBILITY

Jean François Porchez will present a lecture on Parisine project—the making of a new typeface based on the historic type used in the Paris Métro. The idea of the lecture is to comeback to the history of the typeface design in the Métro in Paris and to explain his view about legibility and such things. Porchez will then present the typeface project, which was started in 1996 then extended by the client RATP (the French National Rail Network) in 1999. Essence and Practice | 45 minutes

Lucas Nijs, Frederik de Bleser, Tom de Smedt

EXPERIMENTAL TYPEFACE DESIGN WORKSHOPS

1998–2004, a dozen workshops have been held in Lahti, Finland, Antwerp, Belgium and Dun Laoghaire, Ireland. The assignment was to design an experimental typeface and present it with new media (Macromedia Director, Flash). Some of the results are sown at http://www.designlooksnice.com/Workshops.html. The final workshop’s theme was “Automation” (http://lahti.grafitron.com). With the help of “GlyphGhost”, a new tool that works with FontLab, students designed an “automated font”. They also produced a 724-page book about “Automation” using “DrawBot” (http://drawbot.grafitron.com), a new software tool developed by Just van Rossum, with assistance from Frederik de Bleser and Tom de Smedt. This presentation will demonstrate the results of the workshops. Fonts and Tools | 90 minutes
After the DNA, the ASCII–Code is the most successful code on this planet. The Unicode will even be better. Now is the right time to gather and explain the meaning, history and correct typographic use of each Unicode-Character. Who “invented” the full stop? When did the Infinity-Sign come into being? What’s an Ogonek? In an 18–month project in the department of Design at the University of Applied Sciences in Mainz, Germany, we are collecting images, samples and texts about each and every sign in the Code. In the near future, the project will be opened for anyone to submit their own material. In his lecture, Prof. Bergerhausen will give an introduction to code-history from ASCII to Unicode and will present the project that is supported by the Germany Federal Ministry of Education and Research.

The limitation of typography is a tool called type. Reading is the imagination beyond written language. Impressions that create a shift in our pre-conditioned thoughts make the mind realize that the values of our lives are the sum of all the expressions of all our senses: type is limited. Yet, quality lies in limitations, not in its possibilities. For this occasion I will adapt it to my most recent experiences, design work, publications and teaching in my presentation. In that sense it will cover aspects of typographic experiments, typography and type design education, future developments (culturally, not technically), the redefinition of the letterform between the conventions of legibility and individual (cultural) metaphorical expression. All and all you can say it will focus on the form of language and finding new ways adapting cultural changes.

Petra Černe Oven

THE DEVELOPMENT OF DIACRITICAL MARKS
Tchekhorjipsqui versus Čechořipski

This presentation focuses on the introduction of diacritical marks in Croatian and Slovene languages. The Latin alphabet was used in several Slavonic languages from the early 9th century onwards, and many attempts were made to improve the marking of unique Slavonic sounds through the ensuing centuries. Until the early 19th century, Slovenes and Croatians adopted various solutions for notation of their special sounds; however, none of these solutions was widely accepted. Only in 1830s, Czech diacritical markswere introduced into Croatian language. Events following the Slovene Alphabet War lead to the adoption of Czech diacritics in Slovene printing houses in 1840s. Typographic Babylon | 45 minutes

Mark Barratt

SILK PURSE AND SOW’S EAR
Is decent typography possible in multiple-media projects?

The increasing need to create “documents” that can be conventionally printed and also displayed on the web, PDAs, phones and digital TV in multiple languages, be accessible to blind people, and edited electronically in place by amateurs puts increasing pressure on designers to abandon typographic standards and adopt a lowest-common-denominator approach to the articulation of text. This presentation focuses on the problems and opportunities for the typographer working in this environment. It argues that typographers must return to some pre-DTP disciplines as well as embrace post-DTP attitudes and tools to turn necessity into advantage. It touches on a number of key issues including typeface availability, the relationship between typography and language, and the place of specification. It is illustrated by examples of good and bad projects. Essence and Practice | 45 minutes
There has been some recent interest in Jock Kinneir and Margaret Calvert’s influential traffic signs and accompanying letterforms from the early 1960s for Britain’s national roads. Their signs and alphabets prompted a unique public debate on typography and letterform legibility, which provoked the Road Research Laboratory to carry out large-scale legibility experiments. Many people participated in the heated debate. It was about alphabets and signs that would soon become—and still are—very prominent in Britain’s “visual” landscape and elsewhere in the world. Kinneir and Calvert’s work pointed to the potential value of design in modern public life, and indeed the debate was about design as a visible form of social philosophy. This talk, supported by studies of archival sources and newly opened files, traces this remarkable public debate, and it corrects some partial and misleading accounts already published.

KERNING PARTY  VŠUP

The students of VŠUP will be hosting a party and event on Friday evening, with beer and who knows what surprises, at the VŠUP building.
Vladimir Favorsky (1886–1964) is a key name in Russian graphic art and book design of the twentieth century. He was instrumental to the revival of wood engraving as a creative art technique (not just the means of print reproduction), and the concept of a book as an integrated visual entity. In his book designs Favorsky developed a distinctive approach to lettering. His compositions, and the very letter-forms were heavily influenced by his wood-engraving style. Lettering perfectly integrated with the images played a major role in his cover designs. Letters of varying size, style and nature interacted within the same line, or even word. Favorsky, a profound thinker and art theorist, developed his own concept of lettering design. His classification of letter-forms is based on the spatial attributes of type, and distinguishes between the “profile”—, “volume”— and “space”—related aspects of the glyph.
Ted Harrison, Laurence Penney

**EULAS & FONT PERSONALIZATION**

*Can we embed abstracted EULAs and license info?*

A continuation of the discussion started at TypeCon 2004 in July and continued since on the ATypI forum centering on the feasibility, content and technology of customizing fonts at or before the point of sale to contain essential EULA and license information. An attempt will be made to come to some kind of conclusion at least about content and a demo system will be demonstrated by FontLab and ParaType.

**IMRE REINER: THE ALPHABET AS ART**

Hungarian artist Imre Reiner (1900–1987) was an accomplished illustrator, typographer and type designer who combined his mastery of various disciplines to create a singular, highly personalized approach to graphic design. During the post-WWII period, when type design became increasingly informed by brush lettering and the common hand, Reiner explored alternative tools in search of freer and more authentic expressions of the handwritten form. This presentation will feature Imre Reiner’s unique lettering and illustration and will investigate the artist’s contributions to type design, especially his typefaces’ connection to the handwritten letter.

This paper examines the ways in which national and regional identity are expressed through typographic forms, such as signage and indigenous forms of typographic communication. In particular it will consider the difficulties of identifying and protecting vital regional differences in a climate of globalization and accelerated technological change. It will acknowledge attempts by a number of contemporary designers working in India to identify the essential components of typographic identity, both on a regional and national level. It will move on to speculate how these projects may be of benefit to designers working in the expanding European community. The paper will be illustrated throughout with examples of typographic forms from various regions of India, The Czech Republic and the UK.
Richard Kegler

ON VOJTĚCH PREISSLIG

Vojtěch Preissig emigrated from Prague to the US in 1910. During his 20 years in the US, he participated in active collaborations with American and Czech book arts luminaries. His work helped define the Czech book-arts and typographic identities of the early 20th century. His work is relatively unknown outside of the Czech republic, but recent revivals of his type faces has brought new attention to this aspect of his work. This presentation will survey the typographic designs of Preissig and his prolific output until his return to Prague in 1930. Central and Eastern European Traces | 45 minutes

THE TENDERNESS OF PRINCES BEING LATE, part 2
The practice of Central European diacritics

In this second of two sessions, the focus will be on practical ways of adding CE support to existing fonts. This will cover concepts such as composite glyphs and anchors, and provide testing strategies. It will discuss the place of OpenType in CE fonts and provide strategies for development. The goal is to enable designers to successfully, and easily, support the rich languages of Central Europe. Typographic Babylon | 90 minutes
Unlike his contemporaries, Oldřich Menhart managed to draw international attention to Czech achievements in creating the “national typeface”. He was a modern designer who was actively looking over his own borders, achieving a high level of maturity and quality and looking upon the alphabet as being an evolving organism. Also, related to this was his belief that calligraphy is the only true source of inspiration and innovation in the search for new visual expressions of classic letterforms. This presentation will show interesting visual examples and will illustrate how Menhart managed to translate truly handwritten forms into perfectly elaborated typographical forms performing assuredly and with discipline in printed text.

FONTS FOR MATHEMATICS

Most fonts contain a few math characters, but in most cases these are hardly suitable to typeset any but most elementary mathematics. Very few fonts have been extended to offer a decent set of mathematical characters. This talk will concentrate on the special requirements that mathematical typesetting imposes on fonts, and on the required set of additional glyphs and their design. This should enable font designers to understand the concepts of math typesetting and to give an idea on how fonts could be extended for mathematics—and why it is not that easy. Typographic Babylon | 45 minutes
David Berlow, Gerard Unger, Jean François Porchez, John D. Berry

DAILY TYPES New typefaces for newspapers

David Berlow, Jean François Porchez and Gerard Unger have all designed typefaces that are used in newspapers around the world. How do they solve the problem of creating a typeface that looks both stylish and stalwart, both new and familiar? And how do their individual approaches and styles affect the result? Each will show their best-known newspaper types, then together they’ll consider this highly specialized yet influential form of type design. John D. Berry, moderator. EDUCATION IN TYPE DESIGN
The last few years have seen a revival of interest in typeface design courses. The panelists start with a very very quick presentation each on their respective course, then open the floor to questions from the audience. We look forward to both the easy questions (like “what do students get out of the course?”) and the tricky ones (“why should we teach typeface design formally?”) Between Student and Teacher | 45 minutes

Vladimir Yefimov

CYRILLIC LETTERS their origin, history and evolution
Cyrillic is one of the major alphabet systems of the world. In contrast to Latin alphabet which runs its natural course the history of Cyrillic one is full of very dramatic developments. Cyrillic azbuka (alphabet) was invented in the 9th century on the base of Greek majuscules. In the beginning of the 18th century, Tsar Peter I reformed Cyrillic type making it much closer to Latin. Latinized Cyrillic type has developed in parallel to Latin for two hundred years, repeating all changes of style. However after the Bolshevik Revolution of 1917 the great part of Cyrillic world forced to develop separately for 70 years. And only about dozen years ago Cyrillic could reunite to other typographic world. Central and Eastern European Traces | 45 minutes
By using a paragraph composer that trades off line breaking decisions throughout an entire paragraph, InDesign has improved the line breaking decisions made by a computer. Line breaking by computer is mostly solved. Lately, I have spent time investigating some new concepts to allow users to specify how to position glyphs within both justified and ragged lines for improved control and, ultimately, better typography. I will demonstrate real prototypes of the “InDesign Typography Concept Car” in action. Ultimate control and power but not very user friendly. 

**MICROTYPGRAPHY Designing the new Collins dictionaries**

Designing a dictionary is a very specific challenge involving issues of navigation, legibility and economy: typography and orthography are equally important. Definitions have to be easy to find and easy to read, but occupying the minimum space in order to maximize the content. And because of the scale at which a dictionary's content is expressed, and the particular way in which it is read, microtypographic decisions have an unusually large effect. This talk looks at the history of dictionary design in general, and in detail at current dictionaries in the English language. Along with the job of Collins Art Director came an opportunity to completely redesign Collins dictionaries for a new generation of readers. 

**COMPOSITION OF INNER SPACE**

Typography in Adobe InDesign

By using a paragraph composer that trades off line breaking decisions throughout an entire paragraph, InDesign has improved the line breaking decisions made by a computer. Line breaking by computer is mostly solved. Lately, I have spent time investigating some new concepts to allow users to specify how to position glyphs within both justified and ragged lines for improved control and, ultimately, better typography. TYPEFACES FOR LATIN AND CYRILLIC

Born in former Yugoslavia, Jovica is native to two writing systems: Latin and Cyrillic. This very fact as well as his strong calligraphic background have had impact on Jovica’s lettering and type design style. At ATypI Prague 2004, he will speak about his past and present work, in particular about his more recent multilingual typefaces designed for Adobe Systems. Typographic Babylon | 45 minutes

Erik van Blokland

THE ROBOFAB TOOLKIT AND THE UFO FORMAT

Tal Leming, Just van Rossum and Erik van Blokland have written a Python toolkit for programming with font related data, RoboFab. It has a new, standardized object model for font, glyph, contour and friends. RoboFab supports a new, future-proof XML based file format for font source data, the Unified Font Objects or UFO. This allows scripts based on RoboFab to work the same in FontLab as in plain Python environments, cross platform, cross application. The presentation will show an overview of RoboFab, some examples and practical applications of scripting using RoboFab and some applications using the UFO format. Erik will show miracles like UFO fonts in central database systems, glyphs sent by email, remote controlled FontLab, MetricsMachine, UFO Browser. Fonts and Tools | 45 minutes
As a way of expressing (and finding) identity, the most well-known Hungarian typographers form groups and come up with special editions and exhibition like DÁBLIN (a B1 format 60 to 100 Page long edition that came out 5 times), Postscript (a book edited by ÉLŐ Fejek group formed from the students of Hungarian Academy of Craft and Design) and TRAKTA (a recipe book made by circa 60 typographer in honor to Misztótfalusi Kis Miklós the great typographers of the 17th century). These editions are quite peculiar as they are more work of arts then pieces of design—they communicate only the typographers’ reaction to a central theme but have no other function. Emotional, decorative, and highly personal codes are important characteristics of these thematic publications. I am interested in finding out to what extent visual communication can be personal.

Victor Gaultney, John Hudson, Gerry Leonidas, Geraldine Wade, Vladimir Yefimov, Maxim Zhukov

**WORLD TYPES Design of multilingual typefaces**

**Victor Gaultney:** Designing multiscr ipt typefaces for unrelated scripts. **John Hudson:** Ductus in multilingual typefaces: diversification or standardization? **Gerry Leonidas:** Developing evaluation criteria and approaches to coordinating multi-script typeface projects. **Geraldine Wade:** Designing typefaces for Microsoft: beyond ASCII. **Vladimir Yefimov:** Soviet multilingual typefaces: from Cyrillic to Latin. **Maxim Zhukov,** moderator. Typographic Babylon | 45 minutes

Krisztina Somogyi

**TYPOGRAPHERS & DESIGNERS IDENTITY IN HUNGARY**

As a way of expressing (and finding) identity, the most well-known Hungarian typographers form groups and come up with special editions and exhibition like DÁBLIN (a B1 format 60 to 100 Page long edition that came out 5 times), Postscript (a book edited by ÉLŐ Fejek group formed from the students of Hungarian Academy of Craft and Design) and TRAKTA (a recipe book made by circa 60 typographer in honor to Misztótfalusi Kis Miklós the great typographers of the 17th century). These editions are quite peculiar as they are more work of arts then pieces of design—they communicate only the typographers’ reaction to a central theme but have no other function. Emotional, decorative, and highly personal codes are important characteristics of these thematic publications. I am interested in finding out to what extent visual communication can be personal. Jakob Trollbäck

HELVETICA IN MOTION

After Lars Müller’s “Helvetica”, and Steven McCarthy’s paper, “Helvetica, the Voice of Opposition,” last year at McBride’s, what more could possibly be left to say about Max Miedinger’s 1957 typeface? Well, when it comes to Helvetica in motion, there’s plenty. Jakob Trollbäck will discuss how and why Helvetica has become a staple of his recent motion—graphics projects for U.S. film studios, advertising agencies and television networks. Helvetica has a very special position in motion design, where it obviously provides unsurpassed and much-needed legibility, but more importantly, through its rhythmic shape, can inspire the very choreography of the motion. 

Essence and Practice | 45 minutes

Thomas Phinney

REQUIEM FOR A FONT FORMAT

Why do some font formats succeed and other promising technologies fade into oblivion? Adobe’s Thomas Phinney looks at the demise of multiple masters, and the slow takeup on GX/AAT, as well as the future of OpenType and Type 1. What were the critical mistakes and strategic choices that doomed multiple masters and caused GX/AAT to go nowhere for a decade? What did Adobe learn from these experiences and how did it apply this knowledge to promoting OpenType? What’s the future for Type 1? In his answers, Thomas discusses business strategies, costs and benefits, technology issues, OS and application support, and the influence of service bureaus and printers.

DAVID BERLOW

USA

David Berlow entered the type industry in 1978 as a letter designer for the respected Mergenthaler, Linotype, Stempel, and Haas typefoundries. He joined the newly formed digital type supplier, Bitstream, Inc. in 1982. After Berlow left Bitstream in 1989, he founded The Font Bureau, Inc. with Roger Black. Font Bureau has developed more than 300 new and revised type designs for The Chicago Tribune, The Wall Street Journal, Entertainment Weekly, Newsweek, Esquire, Rolling Stone, Hewlett Packard and others, with OEM work for Apple Computer Inc. and Microsoft Corporation. The Font Bureau Retail Library consists mostly of original designs and now includes over 500 typefaces. Berlow is a member of the New York Type Directors Club and the Association Typographique Internationale, and remains active in typeface design.

FREDERIK DE BLESER

Programmer and graphic designer The Netherlands

Frederik De Bleser is both a programmer and graphic designer, having graduated in applied informatics and design (Sint-Lucas, Antwerp). As a first-grader in graphic design, he expected to get the “designer’s man-
ual.” Alas, he was even told such a thing doesn’t exist! With the help of some very bright people, he is now searching for “the design rules” using a familiar tool: the computer.

Fri 1 Oct, 13:30, Archa Room 3 | Experimental typeface design workshops

---

**ERIK VAN BLOKLAND**

**The Netherlands**

Dutch type designer. Started the LettError virtual type foundry with Just van Rossum, with whom he worked at MetaDesign. Fame came with the release of Beowolf (co-designed with van Rossum), a font whose ragged edges shift randomly each time you print the font. Another font of his, Kosmik, has a version that flips between three alternates for each character for a more friendly, hand-drawn feel. Most of his fonts are published by FontFont or LettError. With Petr van Blokland and Just van Rossum, he created Robofog, a scriptable font editor based on Fontographer 3.5. Currently, he is key developer of the RoboFab project with Just van Rossum and Tal Leming.

---

**VERONIKA BURIAN**

**UK**

Veronika Burian was born in Prague in 1973. Her family moved seven years later to Munich, Germany where she grew up in a bilingual environment that stimulated her interest in languages. She studied Industrial Design in Munich and worked for several years as product and graphic designer in Vienna and Milan. The involvement into teaching at the Politecnico of Milan and related typeface projects made her focus more exclusively on type design. After graduating in 2003 with distinction from the University of Reading with a MA degree in Typeface Design, she is currently working with Dalton Maag in London. Additionally she is expanding her typeface Maiola, that already includes an extended Latin set, Cyrillic and a Greek is in planning. In 2004, it received the Type Directors Club award “Certificate of Excellence in Type Design”.

TIMOTHY DONALDSON

Type Designer UK

Timothy Donaldson stumbled into making letters, making things with letters and talking about it all, with gestures, to make a living. He is widely considered to be a rebellious, hell-raising joker of a curmudgeon but he is, in truth, quite polite and serious. Applying his personal commitment to the beauty of hand drawn letterforms to modern type design methods has ensured that his fonts frequently reveal the presence of a joyful creativity behind the design. Timothy has received awards for his type designs, which are available from
Adobe, ITC and FontShop International, and is currently expanding his design studio interests, and remains a core lecturer at Stafford College.

LUCAS NIJS

Belgium
Designer

Lucas Nijs, graphic designer. Teaching graphic design at St-Lucas, at the Plantin Genootschap and as a guest teacher at the Institute of Design, Lahti, Finland. Freelancing in Antwerp and in Paris. 1989–1993 worked at Apple Computer Europe in Paris where he experimented on how computers could be used in teaching.

Fri 1 Oct, 13:30, Archa Room 3 | Experimental typeface design workshops
LAURENCE PENNEY

Project Manager, MyFonts.com  
UK

Laurence is a consultant in font technology and font marketing, based in Bristol, England. At university (computer science) he developed a weird and unusable font production system, proving to himself that over-automation of type design is a Bad Thing. He soon went freelance and divined the black art of TrueType hinting, tweaking fonts for Microsoft, Linotype and indie designers. In 1999 he became part of the initial MyFonts.com team, and helped create the site’s unique balance between “newbie appeal” and an extensive typographic resource. He now develops MyFonts.com’s in-house software, contributes editorial content, and co-manages the distributor’s contacts with foundries and designers. Laurence also lectures on font technology at typographic conferences and is visiting lecturer at Reading University.

Sat 2 Oct, 08:45, Archa Room 3 | EULAs & Font Personalization

THOMAS PHINNEY

Program Manager, Adobe Systems  
USA

Thomas Phinney is involved in the design, technical, historical and business aspects of type. His new typeface, with the working name of “Geode,” is an upcoming Adobe Original release. Thomas has worked with Adobe’s type group for seven years, currently as program manager for fonts and core technologies, and has recently relocated to Adobe’s Seattle offices. He has a Master’s degree in typography and design from RIT, and an MBA from UC Berkeley.

RICK POYNOR

UK Editor, Writer

Rick Poynor founded Eye magazine (www.eyemagazine.com) in London in 1990. He edited it for seven years and now writes a column for Eye and its website. He contributes a regular column to Print magazine in New York and he has covered design, media and visual culture for more than 40 publications around the world, including Blueprint, Frieze, Domus, Etapes, I.D., Metropolis, Harvard Design Magazine, Adbusters, The Guardian, and The Financial Times. He is a co-founder of www.designobserver.com, a web log for design discussion.

Poynor is author of ten books, among them More Dark Than Shark (1986), a study of Brian Eno’s early songs, and Typographica (2001), a critical study of the influential design journal. Typography Now: The Next Wave (1991), the first survey of the new digital typography, was an international bestseller. He has written two essay collections, Design Without Boundaries (1998) and Obey the Giant: Life in the Image World (2001). No More Rules, a critical overview of graphic design and postmodernism, was published in English, German, French and Spanish editions in 2003.

Poynor lectures widely about design matters in Europe, the US and Australia. He studied history of art at Manchester University and holds an MPhil degree in design history from the Royal College of Art. From
1994 to 1999, he was a visiting professor at the RCA. His most recent project, as guest curator, is the exhibition ‘Communicate: Independent British Graphic Design since the Sixties’, which will open at the Barbican Centre, London in September 2004.

CHRISTIAN SCHWARTZ

USA

Partner, Orange Italic

Christian Schwartz is an independent type designer in New York City and a partner in Orange Italic, a company that exists solely to amuse its proprietors. A former employee of MetaDesign Berlin and later Font Bureau, he has designed commercial fonts for Emigre, FontShop, House Industries and Font Bureau as well as proprietary designs for corporations and publications. His work has been honored by the New York Type Directors club and the Cooper Hewitt National Design Museum.

Fri 1 Oct, 10:30, Archa Hall 1 | The Accidental Text Face

---

TOM DE SMEDT

The Netherlands

Designer

Tom De Smedt serves to evoke the polymorphously perverse co-mingling of arbitrary cultural relativism and terminology; but also the symbiosis between anachronistic language and inner demons and their expulsion. But to whom exactly is it addressed? Such active inroads into the dethroning of the art object echo the Situationist-style institutional interventions. In the latter respect art and language are particularly influential in placing theory on the agenda.

PAUL STIFF

Reader, University of Reading
UK

Paul Stiff’s first ATypI meeting was in 1976. Since then he has taught in the Department of Typography & Graphic Communication at the University of Reading, England, for over twenty years. After more than a decade editing Information Design Journal he founded the annual Typography Papers, the sixth volume of which is now assembling. The work described in this talk is part of a research project funded by the (British) Arts and Humanities Research Board. His co-worker on this project is Petra Černe Oven.

FRANTIŠEK ŠTORM

Storm Type Foundry
Czech Republic

František Štorm was born in 1966 in Prague, Czech Republic. He graduated in 1991 from the Academy of Applied Arts in Prague where he studied book and type design under Professor Jan Solpera, and was an assistant at the same studio between 1991 and 1995. In 1993 founded the Storm Type Foundry in Prague in 1993 with the aim of restoring the values of classical typography for the benefit of digital technologies. Today he is a freelance type-designer, photographer, xylographer and howling computer programmer, as well as the Frantisek is head of the Typography & Type department at the Academy of Arts, Architecture and Design (Vysoká škola uměleckoprůmyslová) in Prague.

JAKOB TROLLBÄCK

Sweden / USA  President/Creative Director, Trollbäck & Company
A self-taught designer from Sweden, Jakob Trollbäck leads an innovative and highly successful company, creates seminal and award-winning designs, and is an acknowledged industry leader in network branding and motion graphic design. His five-year-old company has leapt to the forefront of network design while successfully expanding its creative output to film titles, commercials, publication design, environmental design, music videos and short films. Clients include top TV networks HBO, Lifetime, TCM, TNT, Sundance Channel, and AMC, film companies HBO Films, Fox Searchlight and Miramax, and advertising clients Volvo and Sony. Trollbäck was formerly Creative Director of R/Greenberg Associates, where he ran the Design Department.

JOSEF TÝFA

Czech Republic  Type Designer
Josef Týfa is a living legend of Czech typography, born in 1913. His major contribution for the development of advertising and book design begins in 50s and continues virtually up to the present times. He is author of numerous original typefaces: ITC Tyfa, Academia, Juvenis, Amos, etc. and being 90 years old, still prepares new sketches for digital re-storing of his older designs.

ADAM TWARDOCH

Fontlab Ltd. / MyFonts.com Germany / Poland
Born 1975 in Poland, Adam Twardoch now lives in Frankfurt (Oder), at the German-Polish border. Adam specializes in font tool development, font technology and multilingual typography, with special focus on Central European issues and OpenType. Since January 2004, he is scripting products and marketing manager at Fontlab Ltd. In addition, he serves as typographic consultant to MyFonts.com and provides consulting services to clients such as Linotype Library and Tiro Typeworks. He regularly writes and lectures about fonts and typography. He is member of the ATypi Board and ATypi country delegate for Poland. And he helps type designers to get their ogoneks right.

GERARD UNGER

Type Designer The Netherlands
Gerard Unger (b. 1942) is a graphic designer, type designer, typographer and typographic consultant. He studied at Gerrit Rietveld Academie in Amsterdam, and became a freelance designer in 1972. He now teaches at the Academie, and at the Department of Typography and Graphic Communication at the University of Reading, England. His numerous typeface designs include the highly regarded newspaper types Swift and Gulliver, and Capitoleum, designed for the city of Rome during the Catholic jubilee of 2000. He has received many awards for his work, including the 1991 Maurits Enschedé prize for his overall contribution to type design.

GERALDINE WADE

**USA** Typographer, Program Manager, Microsoft Corp.

Geraldine Wade is a Typographer/Program Manager in the ClearType and Advanced Reading Technologies group at Microsoft. She has a masters degree in Letterform Design and Typography from Central School of Art & Design in London. She previously worked at Monotype for 12 years as a senior type draughtsman. In 1990, while at Monotype, she was trained by Microsoft in TrueType hinting and was one of the lead type engineers for Windows 3.1 core fonts. Geraldine joined Microsoft in 1999. During this time she has worked on fonts for Windows 95, 98, and 2000 including Palatino Linotype, and the MS Reader. She has designed fonts for screen and print with John Hudson of Tiro Typeworks such as Sylfaen and more recently Nyala, which won a Type Design Award this year and in working with Microsoft Research produced a paper accepted at SIGGRAPH in 2000 titled “Example-based hinting of TrueType fonts” by D. Zongker, G. Wade, and D. Salesin.

TARO YAMAMOTO
Manager, Adobe Systems  Japan
Taro Yamamoto received a BFA from Musashino Art University in 1983, where he studied the history and art of typography. After a stint doing type development with Morisawa, he joined Adobe in 1992 as Manager of Japanese Typography. In addition to management and engineering tasks, he led the design team that produced Adobe’s original Japanese typefaces, including Kozuka Mincho and Kozuka Gothic, under the artistic direction of Masahiko Kozuka. He has also written a book on design (“Representation or Expression: a Dialogue on Design”) and an article on P.S. Fournier that appeared in “An Encyclopaedic Collection of Typefaces.” Yamamoto is also the ATypI country delegate for Japan.

**PAVEL ZELENKA**

**Czech Republic**

Pavel Zelenka was born in 1970 in the Czech Republic. After five years of medical studies he left university to become graphic designer. In 1995 he co-founded two-person DTP business called Marvil, which within a few years became a full service graphic and pre-press company employing 10 people. His work has been awarded in annual exhibition “The most beautiful books” in Prague. He is an OpenType and Unicode enthusiast and his company, Studio Marvil, has converted more than 3000 fonts to OpenType format for URW++. In 2003, together with his friends, he began to publish Typo magazine, a Czech/English bi-monthly concerning typography, visual communication and graphic design.

EXHIBITS

Exhibits @ Archa Theatre:

TDC 50 & TDC2 2004
The Type Directors Club Exhibition consists of two exhibits: TDC 50, the winners of the 50th Annual International Competition, which showcases the best in typography for the calendar year of 2003. TDC2 2004 consists of the winners of the Type Directors Club Typeface Design Competition. The works of both exhibits will comprise the Type Directors Club Annual, Typography 25, designed by Diego Vainesman, and published by HarperCollins Publications. The annual will be available in December.

The Type Directors Club is an international professional organization dedicated to educating its membership on type, type history, type in design, type as it relates to new technologies, and the power of type as a communications tool. For over fifty years TDC has been involved in the graphics arts industry. Its members include type designers, type directors, art directors, graphic designers, calligraphers, and those who have a fondness for the letterform. To join TDC (and get a free copy of Typography 25), go to www.tdc.org.

TDC50 – The Type Directors Club This year’s TDC typography competition marks a unique set of numbers: the fiftieth competition for the year’s best typography, to be published in the twenty-fifth edition of the Annual of the Type Directors Club, Typography 25.

In those fifty years, in fifty exhibitions, in twenty-five books, and in twenty-five catalogs before, lies a record of change and movement. Æsthetics have changed, taste has changed, production has changed; we’ve all changed. Text has changed, type has changed. We have come so far; have we come not far at all? Type is all over, all under, and all around; you use it, they use it, we use it, their cousins use it.

Is type used differently than it was, back when it was available to only the select, when it was the preserve only of the initiated? Is it only the use of type, or is it typography? Have the several technical and æsthetic revolutions gotten us any further, or just spun us back around? Do we know more or less, or do we do less with more? Have we advanced the ways typography addresses its audience, clarifies the client’s text, and still expresses the artist’s anxious vision? How do we create in an environment of democratized type: do we find new ways of expression, or do we find the basics to be still true? Is it all half of one and twenty-five percent
of the other? Now, for the fiftieth year, it is the Type Directors Club’s honor to invite artists, designers, typographers, bookbuilders, and even type directors to respond with their works, to say yes, we have come far: we do know more, we do communicate more clearly, we are the stronger for the work that has been done before—we’re the best of 2003.

Gary Munch, Chairman, TDC50

THE SOTA TYPEGALLERY2004

The Society of Typographic Aficionados (SOTA) brings its annual TypeGallery to Prague during ATypI. First exhibited at TypeCon2004 in San Francisco in July, TypeGallery2004 features an unjuried showcase of new type design from around the globe. The TypeGallery also includes the Tupigrafia and Letras Latinas exhibitions of exceptional type, design, and lettering from Latin America. A visual chronicle of Underware’s “Shut Up and Listen” workshop is part of the SOTA show, along with another taste of the Netherlands, a display of posters from Dutch designers. The work of Ed Benguiat is also featured in the TypeGallery, as part of a tribute to the prolific type designer and lettering artist, who received the second annual SOTA Typography Award at TypeCon2004.

To join SOTA, go to www.typesociety.org.

Exhibit @ Museum of Decorative Arts:

**e-a-t (EXPERIMENT AND TYPOGRAPHY)**

*selection of contemporary Czech and Slovak work (1995–2004)*

Museum of Decorative Arts in Prague

Exhibition Hall, 17. listopadu 2, Prague 1

The exhibition runs from September 2 until September 30, 2004

Daily except Mondays 10:00 – 18:00

**e-a-t** (experiment and typography) is a project which reunites designers from the Czech and Slovak Republics. It is a platform to expose typographic work from both countries and acknowledges the fact that the Czech Republic and Slovakia were once a single state. The first e-a-t exhibition presented 35 authors, and the collection continues to expand progressively with new, undiscovered works from the last 20 years. e-a-t is the enthusiastic initiative of designers/curators Alan Záruba (CZ) and Johanna Balušíková (SK), who
are both inspired by type work with origins which are local and from abroad. A special viewing for the ATypI conference guests is organized on 30th of September 2004 in the museum. The show focuses on projects which document the development of designers’ ideas. Attention is paid to the process of creating innovative solutions in the fields of type design and typography, often engaging experimental processes as a means to approach unknown territory. Both the ideas in progress and finished works are core elements of the concept. Our intention is not to chronologically survey the body of work done in the Czech Republic and Slovakia: we prefer to draw attention to a selection of intelligent concepts which address the environment, changing technologies, consider the subjective and personal, etc. The e-a-t exhibition presents the various type design projects in large format posters (1.7 × 1.5m) which unite the form and function to support the individual stories. Creative processes are documented in large numbers of sketches and notes. To complement the variety of projects we consider worth displaying, there is also multimedia work and printed matter, both from commissioned and independent work. We will distribute information about new projects through several e-a-t exhibitions and a regularly updated website. We hope to create debate within the professional audience and to publish a comprehensive book featuring the projects and thoughts behind them. Above all, we intend introduce our work abroad where this subject is still undiscovered.

Special viewing & reception for the ATypI conference in Prague
Thursday, September 30, 2004 at 16:00
The private reception will be hosted by curators Johanna Balušíková and Alan Záruba
Exhibit @ VŠUP:

PRAHAAG
Joint exhibition of students of typography from Prague and The Hague
30 September – 30 October 2004 A Tribute to the ATypI 2004 Conference
Daily from 10:00 to 18:00 at VŠUP

Beatrice Warde’s brief text “This is a printing office ... crossroads of civilization ...” was the inspiration for the organizers of this year’s ATypI Conference in Prague. Taken out of its original context, this slogan has subsequently become a starting-point for end-of-the term works of students of two studios of graphic design at the Academy of Arts, Architecture and Design in Prague. The present exhibition is a pretext for the presentation of works of our students; it should remind the visitors to the conference that Prague is not only a crossroads of certain civilizations, but also the home and the workplace of talented graphic designers with a wide view of the world.

A meeting of three typographic studios (schools), which maintain friendly relations with each other, would be in itself sufficient to fulfill the meaning of the word “crossroads” conceived as mutual interpenetration and inspiration by creative ideas, if we considered typography as an ancillary art discipline only... The typeface and the study of its character in various languages of the world is the subject of interest of the students of TypeMedia, the postgraduate department for Type Design and Typography at the Royal Academy of Arts in The Hague. Each of the twelve students of this department (Erik van Blokland, Paul van der Laan, Just van Rossum, Petr van Blokland, Françoise Berserik, Frank Blokland, Jan-Willem Stas, Frans van Mourik, Fred Smeijers and Peter Bilak) has created, under the guidance of the Academy’s teachers, a draft of an original typeface, which takes into consideration already in its design the specific features of the selected language area. Some of the students in their investigations into the frequency of letters in various languages and their professionally executed digital realizations of original alphabets have reached the boundary of genuine scientific research. The students from the Haag prove by their exhibits that the visual identity of a cultural institution, a company or an orientation system within a public space can be built on the firm basis of an unmistakable typeface.
The Studio of Graphic Design and Visual Communication, headed by Rostislav Vaněk, solved the theme of the “crossroads” in a close link to the promotion of ATypI as a bearer of traditional values and promoter of innovative trends in typography. By means of an effective graphic short-cut, linked-up to simple, animated visual signs and with the use of contemporary aesthetic reflections, Vaněk’s students achieve crystal clear communicability and easy realizability of each of the designs exhibited. The works of these students, created under the careful guidance of their teacher, rank with the top of European graphic design. Lettering was not always a bearer of powerful art emotions. Today, however, we are witnesses to further gradual interpenetration of typography and absolutely free art. At present even a conceptual artist can find a common language with a typographer. There are no longer any hard and fast lines that would separate the individual areas of graphic design. In the studio of Type and Typography, headed by František Štorm, the emphasis is placed on an individual and unmistakable style. In this studio, loosely formulated assignments stimulate the development of the student’s personality, so that the fourteen students participating in the exhibition represent the same number of diametrically differing answers to the question, what exactly is this crossroads of civilizations.

František Štorm, 22 August 2004
ATypI in Prague: 1969–2004

By Adam Twardoch, Country Delegate of Poland and ATypI Prague 2004 Program Committee Member

After 35 years, Association Typographique Internationale (ATypI) is returning to Prague, Czech Republic, for its 48th annual conference. The first ATypI Prague conference took place in 1969.

In March 1968, my dear friend and great Polish typographer Andrzej Tomaszewski was doing his compulsory military service. He was fortunate not to have to go to Prague in a tank – but some of his colleagues had to. It was a terrible experience, both to the citizens of Czechoslovakia and to the soldiers from the Warsaw Pact countries. One year later, his father Roman, a renowned typographer and designer, long-time ATypI Board member and country delegate for Poland, joined other typographers at the historic ATypI Prague 1969 congress.
Andrzej recalls his father’s and his own memories: “The first ATypI Prague conference (the eleventh ATypI conference) was planned to take place in 1968. However, as the older ones among us remember, 200,000 soldiers from the Warsaw Pact and 5,000 tanks (including many from Poland) invaded Czechoslovakia and violently stifled the Prague Spring – a movement that was giving great hope to Czechs, Slovaks and people from neighboring countries. The Prague meeting of typographers, designers and printers was rescheduled for the following year. Paradoxically, the political tragedy made the ATypI event even more important. Many significant personalities decided to go to Prague despite all obstacles, including the legend of European typography, Jan Tschichold from Switzerland, the elegant John Dreyfus from England, the readability researchers François Richaudeau from France and Bror Zachrisson from Sweden, the very popular West German designer Kurt Weidemann and the Dutch typography expert Gerrit Willem Ovink. The convention was held in the assembly hall of the Charles University Faculty of Law, and was chaired by Oldřich Hlavsa from Czechoslovakia and Roman Tomaszewski from Poland, among others. A very real topic back then was the transition of visual information from the Gutenberg galaxy to the computer era – a subject that is still of concern.”

In 1968, the Czech and Slovaks started their run for freedom, but it was too early. The ATypI conference was to coincide with this political development that turned out horribly. Despite the tragedy, the ATypI conference was not cancelled, but only postponed. Finally the typographers came together in Prague to prove that typography can be a means of communication above barriers. Despite the tension between the political forces, type artists from both sides of the Iron Curtain met, talked and enjoyed the time together. It reinstated the fact that the political division of Europe between West and East was artificial.

In 2004, after 25 years, this run for freedom will be symbolically finished. This year, another political process is taking place, but this time the outcome will be very different. The Czech Republic and other Central and Eastern European countries join the European Union, manifesting that the political division is finally over – beyond all doubt. Thirty-five years later, ATypI comes to Prague once again, to celebrate the dialogue, the cultural exchange and the communication.

To some, this may sound like a cliché, but for me, it’s reality – even that I was born six years after the first ATypI Prague congress...
IF YOU NEED HELP IN PRAGUE...

If you need help, you can call ATypI’s Executive Director Cynthia Batty: (USA) +1 201 978 0542.

EMERGENCY PHONE NUMBERS IN PRAGUE
Emergency Central Number ................................................................. 112
Police .................................................................................................. 158
City Police .......................................................................................... 156

PAY PHONES IN PRAGUE
Pay phones in the Czech Republic come in two kinds – those that accept coins and those that accept telephone cards. Both types of pay phones are available all over Prague and the Czech Republic. Telephone cards can be purchased at post offices, newspaper stands, hotels, stores and many other places. They are convenient for longer or more expensive phone calls or if you do not want to have to worry about having coins with you all the time.

INTERNET CAFÉS
You can find internet cafés with high-speed Internet connections at almost every corner in Prague. Prices and opening hours vary, however almost all cafés close by 10 p.m.

GOOD INTERNET RESOURCE FOR PRAGUE
www.myczechrepublic.com – an excellent English-language website with lots of information about the Czech Republic and Prague.

Credits and Thanks

The ATypI Prague 2004 logo was designed by Roman Černohous (cernohous@chello.cz) as part of a student assignment under Professor František Štorm at VŠUP. Roman designed the conference T-shirt and this Program as well, the latter with the assistance of Pavel Zelenka of Studio Marvil. The maps were designed by Filip Blažek of Designiq. Printing was provided by TYPO magazine.

The ATypI Prague Conference Website was built and maintained by Mark Barratt of TextMatters and Adam Twardoch of Fontlab Ltd. and MyFonts.com

Pavel Zelenka has been extremely helpful on many matters in the preparation of the conference, over many months, as has Maxim Zhukov. And in the final days before the conference, Alan Zaruba has helped us with arrangements on the ground in Prague and at Archa Theatre.

The ATypI Executive Director, Cynthia Batty, wishes to thank these contributors, without whom the Conference would have been impossible.
