Dear Jane,

I am writing to thank you so much for all the work you and your department put in on the Rehabilitation Medicine Community Outreach evaluation project. The report helped greatly in demonstrating the value of the service to all stakeholders which has subsequently informed our business planning process.

I am very pleased to let you know that the business case submitted to the investment programme board for the continuation of the outreach service in its current form has now been approved. We have received confirmation that the demand and capacity plans submitted to the CCG have also been accepted, so we are now in a position to move forward with permanent recruitment to take effect from 1 April 2016.

Thanks, once again, for your contribution to this successful outcome.

With best wishes,

Anita Cooper  
Clinical Lead – Therapies and Rehabilitation Medicine
